

Long Run Labels

Do you and your customers have a big label job? Where do you go? TDG is dedicated to producing your long run direct thermal and thermal transfer labels. We can produce your labels on any size core, not just a 1" ID fiber core. We also rewind our rolls tighter than traditional labels allowing for more labels per roll and preventing the roll from unwinding prematurely when placed in the printer. Whether your job requires multiple die cuts, multiple colors, or removable adhesives, look no further, TDG is your source for long run labels.

TDG is Your Expert for Long Run Labels
