

# Point of Sale Evolution

Are you and your customers evolving with today's computer check out systems? Just because computerized cash registers are replacing your traditional markets with papers rolls doesn't mean that you can't cash in at the check out. TDG's custom printed rolls allow your customers to distinguish themselves from all those blank "Thanks for Your Business" rolls by sending their own custom printed message all the way home. Whether their message is a warm smile, a friendly handshake, a loyalty coupon or other creative promotion, help your customers evolve and deliver their message with custom printed cash register rolls.
